Inkwell Modelling Workflow Developers Pricing FAQ [Docs] [Start writing]

THE HEADLESS CMS FOR EDITORIAL TEAMS

Write like a newsroom. Ship like an *API.*

Inkwell gives editors a calm, focused place to write and gives developers clean, structured content over a fast API. One story, published to your site, app and newsletter at once.

Otters are back on the Calder

STANDFIRST

After forty years away, otters are back on the Calder, and the people who never stopped looking are not surprised.

The first sighting came on a wet Tuesday in March, a ripple and a whiskered head below the old mill weir. Within a month, volunteers had logged eleven more.

> *“We kept the water clean for them before they came back.”*

Stop the press. You're in.

TRUSTED BY 420 PUBLISHERS — The Halden Review · *Northline Weekly* · FIELDNOTES · Cask & Kettle · **meridian.**

01 — CONTENT MODELLING

Model your content the way your *desk* thinks about it.

Define articles, authors, recipes or live blogs as typed models with references, validation and reusable blocks. No developer needed for a new field.

Article
12 fields · 3 references

Author
7 fields · bylines and bios

Recipe
9 fields · structured steps

Headline *	`text · max 90`
Standfirst	`text · max 240`
Body	`rich text · blocks`
Author *	`ref → Author[]`
Section	`enum`
Hero image	`asset · alt required`
Embargo until	`datetime · tz`

```
model Article {
  headline   Text     @required @max(90)
  standfirst Text     @max(240)
  body       RichText @blocks(quote, image, embed)
  authors    Author[] @required
  section    Section
  hero       Asset    @alt
  embargo    DateTime @timezone
}
```

02 — WORKFLOW & ROLES

From first draft to front page, with *nobody* skipping legal.

Build the stages your newsroom already uses. Each move is logged, every version is kept, and only the right people can press publish.

STAGE 1	STAGE 2 · 3 STORIES	STAGE 3	STAGE 4	STAGE 5
Draft	**Edit**	**Legal**	**Scheduled**	**Published**
Writers work in private, with comments and suggestions.	Section editors tighten copy and check facts.	Flag stories for a lawyer before they move on.	Embargoes honoured to the minute, in any time zone.	Pushed to web, app and newsletter by webhook.

Writer	**Editor**	**Legal**	**Admin**
Creates drafts and suggests edits on their own stories.	Edits any story in their section and moves it forward.	Reviews flagged stories and can block publication.	Manages models, roles, SSO and API tokens.
`create` `comment`	`edit` `approve` `schedule`	`review` `block`	`models` `roles` `tokens`

03 — FOR DEVELOPERS

Typed content, any framework, at the edge.

REST and GraphQL APIs served from 280 edge locations, a typed SDK generated from your models, and webhooks for everything else.

▲ Next.js · ◆ Astro · ● Nuxt · ◇ SvelteKit · ▲ Vercel · ■ Netlify · ⌘ Algolia · ✉ Mailchimp · # Slack · ◎ Cloudinary · ⇄ Webhooks · {} GraphQL

app/stories/[slug]/page.tsx | REST | GraphQL | Copy

```
import { inkwell } from "@inkwell/next";

export const revalidate = 60; // or revalidate on publish via webhook

export default async function Story({ params }) {
  const { slug } = await params;
  const story = await inkwell.article.get({ slug, include: ["authors"] });

  return (
    <article>
      <h1>{story.headline}</h1>
      <Byline authors={story.authors} />
      <RichText value={story.body} />
    </article>
  );
}
```

38^{ms}	420	3.1^{m}	$99.99^{\%}$
median API response, worldwide	publishers and content teams	stories published last year	uptime over 12 months

04 — LETTERS TO THE EDITOR

What the desks are saying.

> Our editors stopped asking for “the old system” in week two. Developers got typed content and our homepage got twice as fast.

Margot Achterberg · Managing Editor, Northline Weekly

> Embargoes across three time zones used to be a spreadsheet. Now it’s a field.

Samir Haddad · Digital Lead, The Halden Review

> We modelled 14 years of recipes in an afternoon and fed them straight into Next.js.

Freya Lund · Head of Product, Cask & Kettle

05 — PRICING

Priced per workspace, not per word.

Unlimited readers and API calls on every paid plan. Pay for the people writing and the models you need.

Monthly ● Yearly `2 months free`

Pamphlet	**Newsroom** MOST CHOSEN	**Syndicate**
For a blog, a small magazine or a side project.	For editorial teams publishing every day.	For groups running many titles and regions.
$0	**$290**	**$1,200**
free forever	per month, billed monthly	per month, billed monthly
→ 3 seats	→ 25 seats, then $12 each	→ Unlimited seats and titles
→ 10 content models	→ Custom workflows and roles	→ SSO, SCIM and audit log
→ REST and GraphQL API	→ Scheduling and embargoes	→ Content localisation
→ Community support	→ Version history, 2 years	→ 99.99% uptime SLA
	→ Next.js preview mode	→ Migration help included

06 — FAQ

Small print, in large type.

- Can we migrate from WordPress or Contentful? +
- Do editors need to know anything technical? +
- How does preview work with Next.js? +
- Where is our content stored? +
- Is there a limit on API calls? +

Your next edition starts *here.*

Create a workspace in a minute. Bring your team, model your first story type, and publish by the afternoon.
