New Shared spaces for couples and housemates

Pocketly.
Money, sorted.

Everyday banking that shows you where every pound went.

One balance across your accounts, spending grouped by category without you lifting a finger, transfers that land in seconds and card controls you can change from the bus stop.

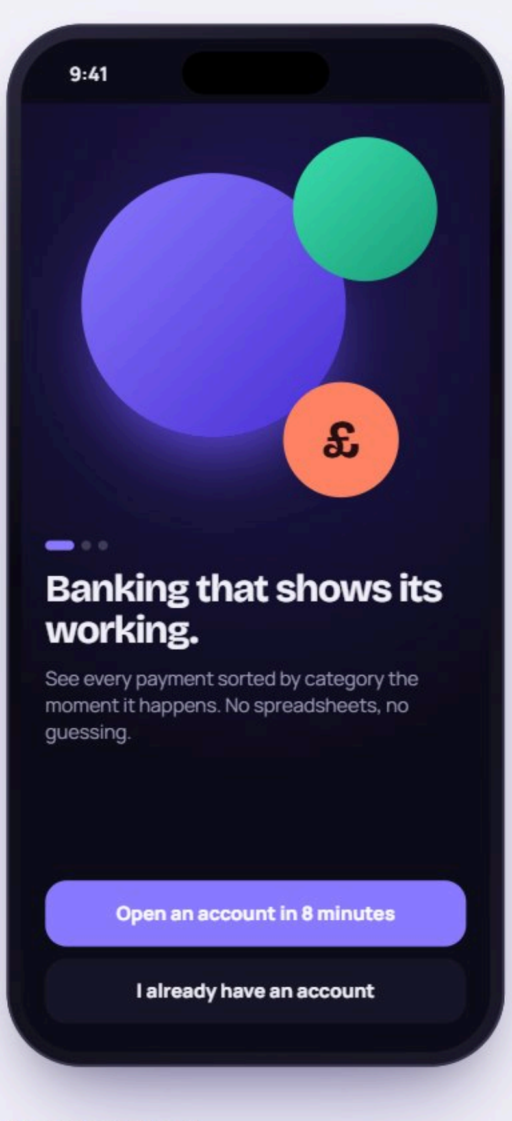
— SCREENS

Four screens people open every week

Beyond the main tabs, these are the flows our testers came back to most: signing up, checking a payment, saving towards something and keeping a budget honest.



9:41
Banking that shows its working.
See every payment sorted by category the moment it happens. No spreadsheets, no guessing.

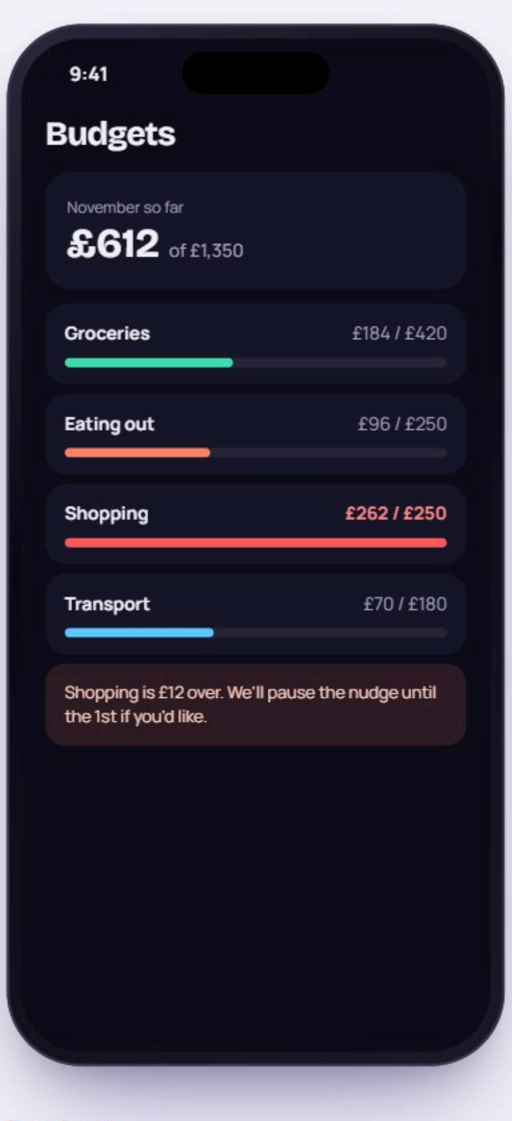
Lisbon in March
68%
£1,360 of £2,000
Auto-save — £40 every Friday — On
Round-ups — £18.32 added this month — On
At this pace you'll reach £2,000 on 6 March, eight days early.

Savings goal

A pot with a date. Round-ups and a weekly auto-save do the work quietly.



9:41
Budgets
November so far
£612 of £1,350

Groceries	£184 / £420
Eating out	£96 / £250
Shopping	£262 / £250
Transport	£70 / £180

Shopping is £12 over. We'll pause the nudge until the 1st if you'd like.

Budget

Limits per category that warn early and never lecture.

— KEY FEATURES

Built for the ten seconds people actually spend in a banking app

01
One balance, every account
Everyday, savings pots and joint accounts add up on the home screen, with a weekly trend line underneath.

02
Automatic categories
Payments are sorted into groceries, bills, transport and more as they clear. Fix one and similar payments follow.

03
Send in three taps
Pick a person, type the amount, confirm with Face ID. Most transfers land in under ten seconds.

04
Card controls that stick
Freeze a lost card, cap monthly spending or switch off cash withdrawals, and every change applies instantly.

05
Pots with a deadline
Savings goals with a target date, weekly auto-save and round-ups from everyday spending.

06
Shared spaces
Couples and housemates split bills from a joint pot and see who paid what, without the group chat maths.

— DESIGN NOTES

A dark interface that stays calm about money

The app runs on a near-black canvas so balances and colours carry the meaning. Each spending category keeps the same colour everywhere it appears: chart, list, budget and notification.

— USER FLOW

Send money in 3 taps

The old flow took seven screens. We cut it to three by remembering recent payees and moving confirmation into Face ID.

1
Tap a face
Recent and favourite people sit at the top of Pay. No sort codes for someone you've paid before.

→

2
Type the amount
A big keypad, available balance underneath and a gentle shake if you go over it.

→

3
Confirm with Face ID
One glance sends it. Sam gets a notification and you get a receipt in Recent.

→

✓
Arrived
Average time from first tap to money landing: 6 seconds across 40,000 test transfers.

Try it on the phone above: open Pay, pick a contact and type an amount.

— RATINGS

4.8 out of 5 from 11,200 people

4.8
★★★★★
App Store and Google Play, Oct 2026

★★★★★

"I finally know what I spend on lunches. It was £190 last month. It's £120 now and I didn't need a spreadsheet."

Nadia F. · Nurse, Manchester

★★★★★

"Lost my card at a gig, froze it before I'd even left the venue, found it in my jacket next morning and unfroze it. Two taps each way."

Owen P. · Sound engineer, Bristol

★★★★☆

"The joint pot sorted out rent with my housemates. I'd like more control over notifications, but the basics are spot on."

Ruth A. · Student, Glasgow

Open an account in about 8 minutes.

Free everyday account, no monthly fee. Pocketly Plus is £3 a month if you want shared spaces and higher pot interest.
