NEW Relay Assist 2.0 now writes in your brand voice

Answer every customer like you have all day.

Relaywise reads each ticket, pulls the right answer from your help centre and drafts a reply your team can send in one click. Faster replies, without sounding like a robot.

Maya Okafor
Order #50177 · L

You're on the list.

Sentiment: calm

Hi! I ordered the linen overshirt in M but it's a bit tight across the shoulders. Can I swap it for an L before my trip on Friday?
Maya · 9:41

Thanks Maya, checking stock for you now.
Jordan (you) · 9:42

✦ Suggested reply — From: Exchanges policy · Stock: L in Sand (14)

Good news, the overshirt in L is in stock. I've set up a free exchange and emailed you a prepaid label. We'll ship the L tod

THE PRODUCT

One inbox. Four jobs done for you.

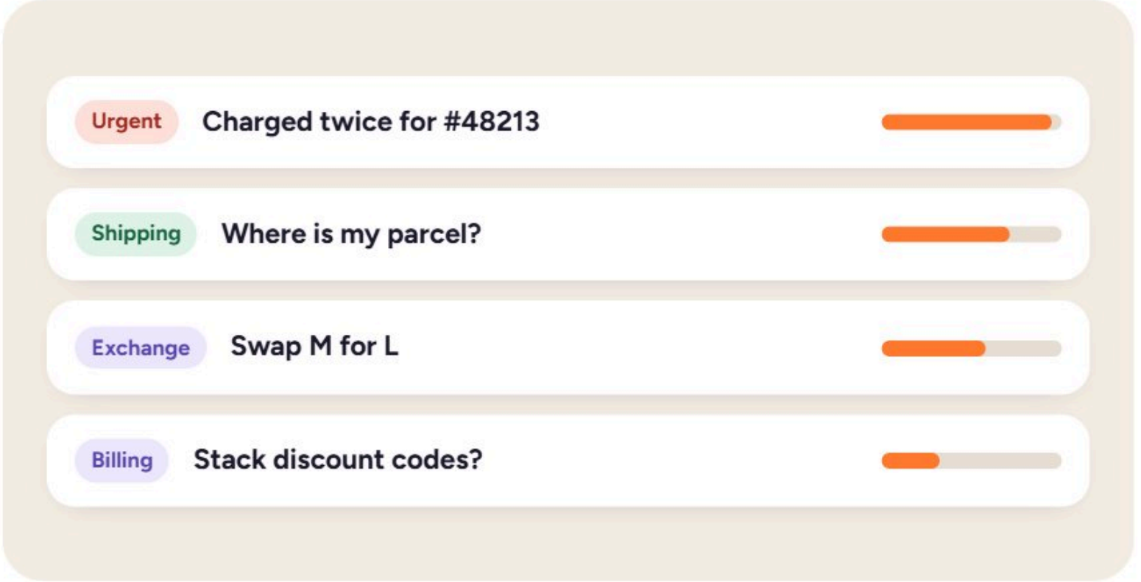
Relaywise sits between your channels and your team, doing the busywork so people can focus on the conversations that need a human.

Triage Draft Resolve Learn

Every ticket sorted before you open it

Relaywise tags intent, urgency and sentiment the moment a message lands, then routes it to the right person.

- ✓ Auto-tags 40+ intents out of the box, or train your own
- ✓ Flags angry or VIP customers to the top of the queue
- ✓ Merges duplicates across email, chat and Instagram



- Urgent — Charged twice for #48213
- Shipping — Where is my parcel?
- Exchange — Swap M for L
- Billing — Stack discount codes?

Built for the way support actually works

Every channel, one queue
Email, live chat, WhatsApp, Instagram and SMS land in the same place with full customer history.

Brand voice controls
Set tone, banned phrases and sign-offs once. Every draft follows them, in 31 languages.

SLA timers that nudge
Gentle reminders before a ticket goes overdue, and smart escalation if it does.

Private by default
SOC 2 Type II, EU data residency and PII redaction before anything reaches a model.

Actions with your stack
Native Shopify, Stripe and Linear actions, plus webhooks for anything custom.

Collision detection
See who is viewing or typing, so two agents never answer the same customer twice.

HOW IT WORKS

Live in an afternoon, not a quarter

No migration project. No consultants. Most teams send their first AI-assisted reply within an hour.

1. **Connect your channels**
Forward your support address or link Zendesk, Intercom or Gorgias. History comes across in minutes, tags and all.

2. **Point it at your knowledge**
Add your help centre URL, macros and policy docs. Relaywise indexes them and keeps them in sync on every edit.

3. **Review, send, improve**
Agents accept, tweak or reject drafts. Each edit teaches the model. Turn on `auto-send` for simple topics when you're ready.

Numbers our customers report after 90 days

62%	faster first response time
38%	of tickets resolved with no agent edits
4.8/5	average CSAT, up from 4.3
11 hrs	saved per agent, every week

LOVED BY SUPPORT TEAMS

Less copy-paste. More "thank you".

> "We cleared a 1,400-ticket Black Friday backlog in two days. The drafts are good enough that my team mostly just checks the order number and hits send."
>
> RA **Rosa Alvarez**
> Head of CX, Pebble & Pine

> "The source links won my legal team over. Every answer shows exactly which policy it came from."
>
> KO **Kwame Osei**
> Support Lead, Kitebank

> "New hires are useful on day two instead of week three. That alone paid for it."
>
> EM **Elin Moberg**
> Ops Manager, Juno Travel
